

# UK GOVERNMENT APPROVED PRODUCTS

Our range of high security fencing will allow you to have peace of mind and provide maximum protection against intruders. Each high security fencing system has its own specific attributes allowing you to choose the right height security fencing system for you.

To meet the demands on perimeter security in light of new and escalating threats, we have invested heavily in the development of high security fencing systems designed to be employed in the highest security situations, against a range of threats from determined intrusion to the mitigation of collateral damage. This investment was born from a realisation that you cannot simply go on stretching the performance limits of existing products against increasingly sophisticated, determined and audacious attacks and expect them to cope.

# UK Government consultation paper

on sustainable production and use of chemicals

Industry Aides Report on a paper which has been criticised by some sections of the chemical industry for not being radical enough

**I**t is unlikely to be the European Union's Environment Directorate, but the European Chemical Industry Association (EFCA) has criticised the UK government's consultation paper on sustainable production and use of chemicals. The paper, which was published in April, is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'.

The paper is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'. The paper is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'.

The paper is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'. The paper is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'.

**'A big change is needed within science and industry'**  
(p10 and p11)

The paper is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'. The paper is the first of a series of papers which will be published by the government over the next few months. The paper is titled 'Sustainable Production and Use of Chemicals: A Consultation Paper'.
